RZB Finance (Jersey) II Limited

Notes to the financial statements

For the period ended 30 June 2010

1 Reporting entity

RZB Finance (Jersey) II Limited (the “Company”) is a public company domiciled in Jersey. The address of the Company’s registered office is noted on page 1. The Company’s activities consist in raising finance for other group companies of which the Company forms part.

2 Accounting and valuation principles

The consolidated financial statements of RZB Finance (Jersey) II Limited (the “Company”) are prepared in conformity with the International Financial Reporting Standards (IFRS) published by the International Accounting Standards Board (IASB) and the International Accounting Standards adopted by the EU on the basis of IAS regulation 8EC) 1606/2002 including the applicable interpretations of the International Financial Reporting Interpretations committee (IFRIC/SIC). The unaudited interim report as of 30 June 2010 is prepared in conformity with IAS34. In the interim reporting, exactly the same accounting and valuation principles and consolidation methods are applied as in the preparation of the 2009 consolidated financial statements.

3 Financial risk management

3.1 Overview

The Company has exposure to the following risks from its use of financial instruments:

- credit risk
- liquidity risk
- market risk.

This note presents information about the Company’s exposure to each of the above risks, the Company’s objectives, policies and processes for measuring and managing risk, and the Company’s management of capital. Further quantitative disclosures are included throughout these financial statements.

The Board of Directors (‘Board’) has overall responsibility for the establishment and oversight of the Company’s risk management framework.

3 Financial risk management (Continued)

3.1 Overview (Continued)

The Company's Board is responsible to identify and analyse the risks faced by the Company, to set appropriate risk limits and controls, and to monitor risks and adherence to limits.

The Company was set up to raise finance for the group (of which Raiffeisen Landesbanken-Holding GmbH is the ultimate parent). This was achieved by the issue of a financial instrument listed on the Luxembourg stock exchange, the proceeds of which were advanced to a group entity. No other similar transaction was carried out by the Company and therefore the operations for the year consisted in servicing the financial liability from the income generated by the financial asset. In addition, the Company incurred minimal administrative expenses. As a result, the Board deems its sole involvement as sufficient to monitor the risks faced by the Company and need not delegate any specific duties to Board committees.

3.2 Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's receivables from customers and investment securities.

3.2.1 Loans

The Company's main financial assets consist of the long-term loan receivable from a group entity, Raiffeisen Zentralbank Osterreich AG (RZB) and its corresponding interest receivable at year-end. The company's revenue derives mainly from this financial asset.

The Board monitors the credit risk continuously based on external ratings of RZB.

No triggers of impairment were identified on the loan receivable, with interest always received as per conditions of the loan. The debtor has a long term credit rating of A/negative outlook from Standard & Poor's. Given this rating, management does not expect the counterparty to fail to meet its obligations.

3.2.2 Guarantees

The Company does not provide financial guarantees.

3.3 Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

Due to the nature of the Company's operations, the Board considers liquidity risk faced by the Company as minimal. The most significant cash outflow consists in the payment of interest payable on financial liability. The timing of its cash outflows falls due on the same dates of the cash inflows from the financial asset. The Board considers its available cash resources as enough to meet other cash outflows which mainly consist in administrative expenditures

3 Financial risk management (continued)

3.4 Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

Due to the structure of the Company's assets and liabilities, particularly the back to back terms and conditions of the principal financial asset and liability, market risk is also considered to be minimal.

3.4.1 Currency risk

With the exception of certain administrative expenses which are denominated in GBP, all other transactions are undertaken in Euro.

3.4.2 Interest rate risk

Interest incurred on the financial liability is on fixed rate basis whilst the amount receivable from the loan to group entity yields a fixed margin over this rate.

3.5 Capital management

The Company's assets and liabilities and the relative underlying terms and conditions allow for a highly probable annual margin that increases equity. The Board's policy is to have a sound capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. As the net interest income was established on incorporation of the Company, there is little scope for the monitoring of the return on capital. The Board of Directors monitors the level of dividends to ordinary shareholders.

All ordinary shares are held by Raiffeisen Malta Bank plc and the Company does not have any share option schemes or hold its own shares.

There were no changes in the Company's approach to capital management during the year.

The Company is not subject to externally imposed capital requirements.

Issued and Fully Paid Up		
1,000,000 Perpetual Non-Cumulative Non-Voting Fixed/Floating Rate Preferred Securities at EUR100 each	100,000,000	100,000,000

Holder of perpetual non-cumulative preferred securities receive dividends which will be payable from (and including) 31 July 2003 to (but excluding) 31 July 2013, annually in arrears on 31 July, in each year commencing on 31 July 2004, at a fixed rate per annum of 5.895%, and from (and including) 31 July 2013 at a rate of 2.70% per annum above the Euro-zone interbank offered rate for three-month Euro deposits (EURIBOR) payable in arrears on 31 October, 31 January, 30 April and 31 July in each year, commencing on 31 October 2013. The preferred securities do not carry the right to vote unless the dividend is in arrears.

The dividend is non discretionary and payment thereof is subject to the conditions included in Clause (a) of the Offering Circular.

The preferred securities are redeemable at the option of the company, subject to law and to the prior consent of Raiffeisen Zentralbank Österreich AG ('RZB') [which shall grant such consent only after either replacement of the principal amount of the preferred securities so redeemed by the issue of other capital of at least equivalent quality or having applied for and been granted consent by the Austrian Financial Market Supervisory Authority (the 'Finanzmarktaufsichtsbehörde' or 'FMA')], in whole but not in part, at EUR100 per preferred security plus accrued and unpaid dividends for the then current dividend period on 31 July 2013 or any dividend date falling thereafter and, subject as described in the "Description of the Preferred Securities".

In the event of any voluntary or involuntary liquidation, dissolution or winding-up of the company, the holders of the preferred securities will be entitled to receive for each preferred security a liquidation preference of EUR100 plus accrued and unpaid dividends for the then current dividend period to the date of payment. Such entitlement will arise before any distribution of assets is made to holders of ordinary shares, preference shares or preferred securities or any other class of shares of the company or any other share or other security issued by the company and having the benefit of a guarantee from RZB ranking junior as regards participation in assets to the preferred securities, but such entitlement will rank equally with the entitlement of the holders of any other preference shares or preferred securities, if any, of the company ranking *pari passu* with the preferred securities as regards participation in the assets of the company.

Notwithstanding the availability of sufficient assets of the company to pay any liquidation distribution to the holders of the preferred securities, if at the time such liquidation distribution is to be paid, proceedings are pending or have been commenced for the voluntary or involuntary liquidation, dissolution or winding-up of RZB, the liquidation distribution paid to holders of the preferred securities and the liquidation distribution per share paid to the holders of all asset parity securities, shall not exceed the amount per share that would have been paid as the liquidation distribution from the assets of RZB (after payment in full in accordance with Austrian law of all creditors of RZB, including holders of its subordinated debt but excluding holders of any liability

expressed to rank pari passu with or junior to RZB's obligations under the 'Support Agreement') had the preferred securities and all asset parity securities been issued by RZB and ranked (i) junior to all liabilities of RZB (other than any liability expressed to rank pari passu with or junior to RZB's obligations under the 'Support Agreement'), (ii) pari passu with all asset parity securities of RZB and (iii) senior to RZB's Bank Share Capital.

If the liquidation distribution and any other such liquidation distributions cannot be made in full by reason of the limitation described above, such amounts will be payable pro rata in the proportion that the amount available for payment bears to the full amount that would have been payable but for such limitation. After payment of the liquidation distribution, as adjusted if applicable, the holders will have no right or claim to any of the remaining assets of the company or RZB.

In the event of liquidation, dissolution or winding-up of RZB, the board of directors shall convene an extraordinary general meeting of the company for the purpose of proposing a special resolution to place the company into voluntary winding-up and the amount per share to which holders shall be entitled as a liquidation distribution will be as described above.

11 Financial instruments

Exposure to credit, interest rate and currency risk arises in the normal course of the Company's business.

11.1 Credit risk

The Company's main financial asset consists of Undated Securitised Commercial Certificates of Obligation issued by Raiffeisen Zentralbank Österreich AG which has a Standard & Poor's long term credit rating of A/negative outlook.

RZB Finance (Jersey) II Limited

Notes to the financial statements

For the period ended 30 June 2010

11 Financial instruments (continued)

11.2 Liquidity risk

The Company's main financial liability consisting of the Perpetual Preferred Securities which have the maturity dates concurrent to that of the main non-derivative financial asset. Furthermore other liabilities are not significant and are sufficiently covered by the cash and cash equivalents and accrued interest receivable. Therefore the Company does not face any significant liquidity risk.

11.3 Interest rate risk

The interest rate on the financial asset is fixed till 31 July 2013, following which the interest rate will become floating at a fixed percentage over EURIBOR. The premium has been set at 5 basis points higher than that on the perpetual preferred securities. A change of 100 basis points in interest rates would therefore have no impact on the Company's results and equity.

11.4 Foreign currency risk

The Company incurs foreign currency risk on certain expenses, which are mainly paid in Pound Sterling. The company accepts the risk and, accordingly, does not hedge against it. A 10 percent weakening of the Euro against the Pound Sterling would have an insignificant effect on the results and equity of the Company.

11.5 Fair values

The fair values of the Company's financial assets and liabilities are as follows:

	Carrying Amount	Fair Value
	EUR	EUR
Financial assets		
Long term loan receivable	100,000,000	56,305,000
	<u>100,000,000</u>	<u>56,305,000</u>
Financial liabilities		
Perpetual preferred securities	100,000,000	56,305,000
	<u>100,000,000</u>	<u>56,305,000</u>

The fair value of the financial liabilities reflects the market price of the securities as quoted by the Luxembourg stock exchange. In view of the fact that the company's financial assets mirror the same terms and conditions of the financial liabilities (with the exception of a 5 basis point difference in the coupon rate) and having regard to the difference between the bid/offer price, the directors are of the opinion that the fair value of the financial asset is not materially different from that of the financial liability.
